Big Bag dumping stations of variable capacity, suitable both to load silos and for the storage of medium ingredients to feed the lines directly. Big bag discharger is ergonomic and allows for the bags to be recycled. It is equipped with chain hoist to lift the bags, easy discharge and change over devices, and easy lock.

Multiline feeding and available in combo version with dump station.

All machinery is compliant with ATEX legislation, designed to match the needs of the ingredients they handle and built in appropriate materials.

Integrated automation, weight control in real time and full traceability.
